FOREWORD

District Industrial Potential Report of Jodhpur-Rajasthan is prepared by this institute under its action plan target for the year 2015-16. The information on material resources, Administrative set up, details about PSUs, Clusters situated in the district, potential for new MSMEs are embedded in this document. The Objective of this report is to expose the resource base, studying industrial scenario of the district, for the benefits of all budding/existing entrepreneurs.

I commend the efforts of Sh. Ami Lal, Investigator in preparing this District Profile. The District profile has been prepared on the information gathered from various Govt. departments and secondary data supplied by them. I extend my thanks to all those departments for their useful contribution in bringing out this document.

Jodhpur District is a district of the state of Rajasthan in western India. The city of Jodhpur is the administrative headquarters of the district.

As of 2012 it is the second most populous district of Rajasthan (out of 33), after Jaipur.

Rajasthan, the land embellished with infinite imprints of colour and chivalry, harmonious life and lingering music, harmony and hospitality, palaces and pristine nature; has been extending an invigorating invitation to the world, since time immemorial.

Jodhpur also known as **SUN CITY**, the heart of Rajasthan and the majestic jewel of her eternal crown, illuminate the Thar, enriching the desert with entrepreneurship, scholarship and art.

According to Rathore tradition, the clan traces its origins back to the Hindu god, Rama, hero of the epic Ramayana, and thence to the sun. So the Rathore's belong to the Suryavansha (solar race) branch of the Kshatriyas, the warrior caste of Hindus. Later, breaking into historical reality, in 470 A.D. Nal Pal conquered the kingdom of Kanauj, near modern Kanpur in Uttar Pradesh. The Rathore capital for seven centuries, Kanauj fell in 1193 to the Afghan invader's led by Muhammad Ghori.

In the 1870's, a remarkable man came to the fore in Jodhpur: Sir Pratap Singh a son of Maharaja of Jodhpur, he himself ruled a neighboring kingdom called Idar, abdicated to become Regent of Jodhpur, which he ruled, in effect, for nearly fifty years. Sir Pratap Singh was a great warrior and the epitome of Rajput chivalry.

1.1 LOCATION & GEOGRAPHICAL AREA :

Jodhpur, one of the largest district of Rajasthan state is centrally situated in Western region of the State, having geographical area of 22850 sq. Kms. It has population of 28.81 Lacs as per 2001 census. The district stretches between 26°00' and 27°03' at north Latitude and between 72° 55' and 73° 52' at East Longitude. This district is situated at the height between 250-300 meters above sea level.

This district comes under Arid zone of the Rajasthan state. It covers 11.60% of total area of arid zone of the state. Some of the area of Great Indian Desert THAR also comes within the district. Extreme of heat in summer and cold in winter is the characteristic of the desert. Jodhpur is no exception. The temperature varies from 49 degree in summer to 1 degree in winter. The Sandstorm (andhi) spectacle for people from other region of India.

Jodhpur district is centrally located in western part of the State. It is divisional headquarter of western districts of the State, i.e., Pali, Jodhpur, Sirohi, Barmer, Jalore and Jaisalmer. It stretches between 26°37' north latitudes and 72° 55' to 73°52' east longitudes. It is bounded by Bikaner and Jaisalmer districts in the north, Barmer and Pali districts in south, Pali Nagaur districts in east and Jaisalmer district in the west. Jodhpur district is in the arid zone of the State and it covers 11.6% of the total arid zone of the State. The area of the district is 22,850 sq.kms. which is 6.59% of the total area of the State.

1.2 TOPOGRAPHY :

The region comprises three distinct physiography units, namely, the alluvial plains, Escarpments and Ridges and Sand dunes. Land surface of the district is nearly flat and sandy with exception of some parts of Bilara and Osian Tehsils. The Plain from Bilara in the east of Shergarh in the west is encircled by a group of hills, isolated hillocks and ridges separated by alluvium and sand filled valleys. The western & north-western parts of district are characterised by sand dunes. There is only one important river in the district, viz., Luni, which enter the district near Bilara and flows for a distance of over 75 kms. before entering in Barmer district.

Malani Igneous Suite, an integral component of the Thar Desert in Rajasthan, extends at the periphery of the desert, to an area of 44,500 square kilometres (17,182 sq mi) covering parts of Pali, Sirh. Jodhpur, Barmer, Jaisalmer, Jalore and Siwana districts of western Rajasthan.^[2] In particular, a rhyolite rock exposure in a hillock of 120 metres (394 ft) height, originally called the "Mountain of Birds", forms the foundation for the imposing Mehrangarh Fort in Jodhpur. The climate here is of extreme desert condition of scorching summer with hot dry winds and arid conditions. The winters are quite chilly. The rainfall is scanty and occurs during late June to September. The average rainfall is reported to be 360 millimeters (36 cm); extremely variable with a minimum recorded of 24 millimeters (2 cm) during the famine year of 1899 and a maximum of 1,178 millimeters (118 cm) during the floods of 1917.

1.3 AVAILABILITY OF MINERALS

Minerals have been playing an important role in development of Jodhpur district for last many decades. District is mainly rich in non metallic minerals like Sandstone, Rhyolite, Dolomite, Limestone, Jasper, Granite & Clay. Murram, Kankar, Brick earth, Bajri and other minor minerals.

AVAILABILITY AND CONCENTRATION OF MINERALS LIMESTONE :

There is a log belt of 160 Kms. long and 0.8 km. wide rocks of Vindhyan system trending from Sojat in Pali district through Bizara in Jodhpur district to Gottan-Mundra and Roll quazia in Nagaur district. Possible reserves are to the extent of 54.0 million tones, half of which are of chemical grade and rest are of flux grade..LM10 Calcium Carbide, Chalk, Hydrated Lime, Quick Lime, etc. may be produced by utilization of this material.

- **SANDSTONE** : This is an important building stone widely utilised in temples, Palaces, Monuments etc. apart from construction of houses. History of its mining is 500 years old.
- **LIMESTONE** : Bilara-Bhopalgarh has been a major limestone belt of the district which contains cement, chemical & steel grade of limestone Limestone mined from this belt is used in cement, textiles, sugar, lime burning industry etc.
- **DOLOMITE** : It contain 16-20% of Mgo and considered as valuable industrial raw material for steel, refractory glass industries.

- **GRANITE** : It is a type of decorative building stone being utilised after cutting and polishing. It is mined around Pipar, Siyara, Khejarala, Rawaniyana, Chokri, Madliya, Kosana etc.
- **RHYOLITE** : Occurances are located near Jodhpur city (Kakani, Ria, Daijar, Sevaki Kallan & Lal sagar). Balesar village.
- **JASPER** : It is a variety of silica having dark red colour occurs in vein/pocket in ferrugenous sandstone near mathania, Osian, Rundia, Sopra, Mogra, Lawera, Tamtia villages.
- **CLAY** : Good quality of ball clay occur near Kanasar, Mandly area of Tehsil Phalodi. It is found suitable for uses in Ceramics, Rubber & Paints.

1.4 FOREST

The total forest area, which is 23650.51 hect., is declared. There is 467.60 hect. is non reserved forest and 16930.79 hect. Is reserved forest area while 6252.12 hect. Area is unclassified forest. No major forest produce is available which can lead to any instruialisation. However, Neem, Siras, Siamea, Cassia, Acacia Tortilis, Propepis, Juliflas, Par Kinsonia, Eucalyptus are being found in the forests.

On account of arid climate, negligible percentage of the total reporting area for the land use in the district is covered under forests. Due to sandy soil only scrub and thorny bushes of vegetation are found in the forest areas of the district. The main species of trees are Kumat, Kair, Khejri, Babul, Bir, Jal khara, Pilu, etc. Fruit bearing trees are promegranates and guavas. The funa of the district include jackal, Jungle Cat, Indian Fox, Black Buck, Chinkara, common hare, etc. The birds commonly found are Baya, koyal, parrot, Vulture, Jungle Crow, bulbul, House Sparrow, Kite, Sand Grouse, Common quail, grey partridge, little egrit, etc.

Famous for its magnificent forts and palaces, Jodhpur is the second largest city of Rajasthan and a major tourist attraction in the country. The city is situated at the edge of the Thar Desert with Jaisalmer on its west, Barmar, Jalor and Pali on its south, Bikaner on its north, and Nagaur on the eastern side. Jodhpur was founded by the Rajput chief Rao Jodha in 1459. The city was the erstwhile capital of the Marwar state. The city is surrounded by a 10 km long wall with eight gates serving as entrances. The new city is settled around this walled area.

1.5 ADMINISTRATIVE SET- UP :-

For administration and development, the district is divided into four sub-divisions, i.e. Jodhpur, Shergarh, Osian and Phalodi and seven tehsils, i.e., Jodhpur, Osian, Phalodi, Bilara, Bhopalgarh, Luni and Shergarh..
