कार्यालय ज्ञापन

विषय:- Fire precautionary Measures to be adopted in Nirman Bhawan.

In view of the onset of peak summer season, it is advised to take the following precautionary measures to avoid any fire incidents:-

1. To switch off all electrical appliances/ gadgets after use and before leaving the office.
2. To ensure that no computer UPS, AC/ lights etc. left switch "ON" by the users when leaving the office.
3. To ensure that no material shall be stacked near switch board, in corridor and exit passage by care taking staff or other users.
4. Joint free AC wire should be used an copper pipes must be insulated. It is generally found that there are multiple joints in AC wire which are the single most common cause of electric fire due to heat generated in it which spreads quickly to inflammable materials like curtains, paper, files, wooden furniture etc.
5. Dusting/ Cleaning in room shall only be done when blower of ACs are switched off.
6. Never use AC units on normal plug points or temporary extension boards except on MCB's operated/ protected.
7. No AC should be installed without concurrence of CPWD.
8. Don't connect more than one electric appliance in one socket. Never overload/overheat the electrical system.
9. Do not remove plugs from sockets without first switching off.
10. Do not run loose electrical wires.
11. No electric kettle or oven etc. will be plugged in computer points to avoid over loading and overheating.
12. Don't place bare wire ends in a socket.
13. Welding, cutting jobs should be carried out under strict supervision.
14. Don't throw of lighted cigarette/ bidi butts and match sticks carelessly.
15. Don't place oil lamps, agarbattis or candle on the floor or near combustible material.
16. Old/unused furniture/almirahs are not to be placed at exit staircase and near electrical main boards/ sub distribution board.
17. No fire detection will be disconnected/ isolated during modernization of room which affect the fire detection work because many Ministries got the repair/renovation works executed by them. This situation can be avoided to get work done from CPWD who Maintain the building.
18. No power supply for the sector indicating panel installed for detection of fire shall be disconnected for the use of charging of mobile phones etc. or for any other reason which affect the fire detection work.
19. Do not silence and reset fire alarm in any case.
20. All employees shall be trained to use fire extinguisher initially and annually thereafter.
21. Mock fire fighting drill should be organized once in a month in consultation with CPWD/CISF/ Delhi fire services so that security personnel deployed in government building under MHA security cover are imparted basic training in fire fighting and handing the fire extinguisher of various types.
22. Do not allow waste paper and other combustible materials to accumulate in the office.
23. Always ensure Good House Keeping. That is the best preventive measure against Fires and their spread.

A. D. Chaudhary
